MANIPAL
ACADEMY of HIGHER EDUCATION
(Deemed to be University under Section 3 of the UGC Act, 1956)

Manipal College of Health Professions

(Mangaluru Campus)

Manipal Academy of Higher Education, Manipal

Outcome-Based Education (OBE) Framework

Two Years Full Time

Postgraduate Program

(Choice - Based Credit System)

Master of Physiotherapy (Paediatrics)

MPT (Paediatrics)

With effect from July 2021

C O N T E N T P A G E

Head of the Department **Dean**

Deputy Registrar - Academics **Registrar**

1. NATURE AND EXTENT OF THE PROGRAM

Background and need of the program:

Physiotherapy in India has a history of over 70 years. It is a changing and evolving profession which encompasses the concepts of public health and primary/secondary prevention, rehabilitation and fitness for work, self-management of long term conditions and the provision of palliative care for all ages. The physiotherapist works in a complex environment and with multidisciplinary teams in primary healthcare industry, schools, hospitals and private practices. This work takes place in diverse communities and cultures. In a climate of changing health needs and healthcare provision, the physiotherapist requires skills in leadership and decision making. Lifestyle changes over the years resulted in an increase in the problems of neurological, musculoskeletal and cardiopulmonary systems. This means that the services of physiotherapists are in greater demand. Here at MAHE, we constantly upgrade our education and clinical skills to keep up with the current needs. The infrastructure at Kasturba Hospital Udupi, Manipal, and Mangalore and Manipal Hospital Bangalore provide an almost unending canvas to work on.

Duration of the Program: Two years

- Four Semesters (Two years) of academic program

Aim of the Program:

i. To provide an opportunity for qualified physiotherapists with an undergraduate degree to practice as Paediatric Physiotherapists.
ii. To educate and empower the students to be independent practitioners using an advanced body of knowledge in a competent manner towards those who need such services, using evidence based practice with autonomy in quality assurance while maintaining the humanitarian approach of service.
iii. To acquire skills required to be an effective theoretical & clinical teacher in physiotherapy, be proficient in research methods and apply these in the pursuance of research in physiotherapy.
iv. To learn elements of administration in order to be an effective physiotherapy manager.

v. To practice life-long learning, professional development, for the benefit of students, the profession and to increase the effectiveness of health and social care delivery.

Entry level Qualification:

i. The candidate must have passed Bachelor of Physiotherapy from any recognized University in India or abroad.

ii. The candidate should have obtained an aggregate of 50% in all subjects of Bachelor of Physiotherapy

Scope of the Program:

On completion of the M.P.T. program, the graduates will be a competent physiotherapy specialist having heightened ethical and moral responsibilities as a health professional, demonstrating strong clinical reasoning skills with evidence-based approach in assessment, clinical diagnosis and intervention of a wide range of diseases and dysfunctions in nervous system. Postgraduates will have job opportunities in various acute hospitals, rehabilitation centers, multispecialty hospitals, special schools, geriatric centers, private organizations, non-government organizations and government institutions.

- Postgraduates can also pursue doctoral studies in clinical areas of their interest and become teaching faculty in the academic institutions.
- Postgraduates may also undertake research in Physiotherapy.

2. PROGRAM EDUCATION OBJECTIVES (PEOs)

The overall objective of the learning outcome-based curriculum framework (LOCF) for MPT (Paediatrics) are as follows:

PEO No.	Education Objective
PEO 1	Students will be able to apply advanced body of knowledge and clinical competency with evidence-based practice in Physiotherapy to achieve professional excellence.
PEO 2	Students will execute high order skills in analysis, critical evaluation and/or professional application of clinical and practical skills in Physiotherapy
PEO 3	Students will practice the profession by ethical norms and communicate effectively with the multi-disciplinary team.
PEO 4	Students will acquire creative proficiency in interpersonal and collaborative skills to identify, assess and formulate problems and execute the solution.
PEO 5	Students will synthesize research ideas, develop innovations, incubate new concepts and encourage entrepreneurship.
PEO 6	Students will display lifelong learning process for a highly productive career and will be able to relate the concepts of Physiotherapy towards serving the cause of the society.

3. GRADUATE ATTRIBUTES

S No.	Attribute	Description
1.	**Professional Knowledge**	Critically appraise scientific knowledge and integrate evidence-based practice as a health care professional
2.	**Clinical / practical skills**	Apply clinical / practical skills to prevent, assess and manage quality health-care services
3.	**Communication**	Displays empathetic and professional communication skills to patients/clients, care-givers, other health professionals and other members of the community
4.	**Cooperation/Team work**	Ability to practice collaboratively and responsibly with multidisciplinary team members to deliver high quality health care
5.	**Professional ethics**	Ability to resolve ethical issues and practice the ethical values in the professional life
6.	**Research / Innovation related Skills**	Ability to generate and investigate research questions and translate the evidence into clinical practice.
7.	**Critical thinking and problem solving**	Ability to reason and judge critically and provide solutions for real life situations
8	**Reflective thinking**	Employ reflective thinking along with sense of awareness of one self and society
9	**Information/digital literacy**	Excel in use information communication and technology in ongoing learning situations
11.	**Multi-cultural competence**	Ability to effectively lead and respond in a multicultural society
12.	**Lifelong Learning**	Demonstrate the ability to acquire knowledge and skills that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to demands of work place through knowledge/skill development/reskilling.

4. QUALIFICATION DESCRIPTORS:

a. Apply (i) Advanced and up-to-date knowledge and excel in the academic field of study as a whole and its applications, and links to related disciplinary areas/subjects of study; including a critical understanding of the established theories, principles and concepts, and of a number of advanced and emerging issues in the field of Physiotherapy (ii) Procedural knowledge that creates different types of professionals related to the Physiotherapy, including research and development, teaching and in government and public service; (iii) Professional and communication skills in the domain of Physiotherapy, including a critical understanding of the latest developments, and an ability to use established techniques in the domain of Physiotherapy.

b. Possess comprehensive knowledge about Physiotherapy, including current research, scholarly, and/or professional literature, relating to essential and advanced learning areas pertaining to the field of study, and techniques and skills required for identifying problems and issues.

c. Proficient skills in i) identifying the issues in health care needs; ii) collection of quantitative and/or qualitative data relevant to client's needs and professional practice; iii) analysis and interpretation of data using methodologies as appropriate for formulating evidence-based hypotheses and solutions.

d. Apply knowledge, understanding and skills for critical assessment of a wide range of ideas and complex problems and issues relating to Physiotherapy in various specialties.

e. Communicate efficiently with all stakeholders, and provide relevant information to the members of the healthcare team.

f. Optimize one's own learning needs relating to current and emerging areas of study, making use of research, development and professional materials based on new frontiers of knowledge.

g. Execute one's disciplinary knowledge and transferable skills to new/unfamiliar contexts and to identify and analyse problems and issues and seek solutions to real-life problems.

5. PROGRAM OUTCOMES (POs):

After successful completion of Master of Physiotherapy (Paediatrics) program, students will be able to:

PO No.	Attribute	Competency
PO 1	**Professional knowledge**	Apply current evidence and **scientific knowledge** to work as an expert member of health care system
PO 2	**Clinical/ Technical skills**	Employ **clinical skills** to provide quality health-care services
PO 3	**Team work**	Empower the **team** with shared goals with the interdisciplinary health care team to improve societal health
PO 4	**Ethical value & professionalism**	Impart **ethical values and professionalism** within the legal framework of the society
PO 5	**Communication**	**Communicate** professionally with the multidisciplinary health care team and the society
PO 6	**Evidence based practice**	Appraise and adopt high quality **evidence-based practice** that leads to excellence in professional practice
PO 7	**Life-long learning**	Advance knowledge and skills with the use of recent technology for the **continual improvement** of professional practice
PO 8	**Entrepreneurship, leadership and mentorship**	Build **entrepreneurship, leadership and mentorship** skills to practice independently as well as in collaboration with the multidisciplinary health care team

6. COURSE STRUCTURE, COURSE WISE LEARNING OBJECTIVE, AND COURSE OUTCOMES (COs)

SEMESTER – I

Course Code	Course Title	Credit Distribution (hours/week)					Marks Distribution		
		L	T	P	CL	CR	IAC	ESE	Total
ABS6101	Advanced Biostatistics & Research Methodology	3	1		-	4	30	70	100
PTH6001	Principles of Physiotherapy Practice	1	2	-	-	3	100	-	100
PTH6003	Clinical Practice in Physiotherapy	-	-	-	36	12	100	-	100
PTH6770	Research Proposal in Paediatrics	-	-	4	-	2	100	-	100
Total		**4**	**3**	**4**	**36**	**21**	**330**	**70**	**400**
Note: ABS6101 will be conducted for 50 marks and normalized to 70 marks									

SEMESTER – II

Course Code	Course Title	Credit Distribution (hours/week)					Marks Distribution		
		L	T	P	CL	CR	IAC	ESE	Total
EPG6201	Ethics and pedagogy	1	1	-	-	2	100	-	100
PTH6702	Foundations of Physiotherapy in Paediatrics	1	2		-	3	50	50	100
PTH6704	Physiotherapy clinical practice in Paediatrics –I	-	-	-	36	12	100	-	100
PTH6780	Research progress in Paediatrics –I	-	-	4	-	2	100	-	100
Total		**2**	**3**	**4**	**36**	**19**	**350**	**50**	**400**
Note: PTH6702 will be conducted for 100 marks and normalized to 50 marks.									

SEMESTER – III

Course Code	Course Title	Credit Distribution (hours/week)					Marks Distribution		
		L	T	P	CL	CR	IAC	ESE	Total
PTH7701	Physiotherapy in general Paediatrics	1	2	-	-	3	50	50	100
PTH7703	Physiotherapy clinical practice in Paediatrics - II	-	-	-	36	12	50	50	100
PTH7705	Evidence based physiotherapy practice in Paediatrics	1	1	-	-	2	100	-	100
PTH7770	Research Progress in Paediatrics - II	-	-	6	-	3	100	-	100
	Total	**2**	**3**	**6**	**36**	**20**	**300**	**100**	**400**

Note:
PTH7701 will be conducted for 100 marks and normalized to 50 marks
PTH7703 will be conducted for 100 marks and normalized to 50 marks.

SEMESTER - IV

Program Elective

The student may choose from anyone options from the list of Program Elective combinations provided in the table below.

Option-1: Elective in Paediatric Neurology

Course Code	Course Title	Credit Distribution (hours/week)					Marks Distribution		
		L	T	P	CL	CR	IAC	ESE	Total
PTH7712	Physiotherapy in Paediatric Neurology	1	2	-	-	3	50	50	100
PTH7714	Clinical practice in Paediatric Neurology	-	-	-	36	12	50	50	100
PTH7780	Research project in Paediatrics	-	-	10	-	5	50	50	100
	Total	**1**	**2**	**10**	**36**	**20**	**150**	**150**	**300**

Note:
PTH7712: will be conducted for 100 marks and normalized to 50 marks
PTH7714: will be conducted for 100 marks and normalized to 50 marks.

Option-2: Elective in Neonatal and Paediatric Respiratory Care

Course Code	Course Title	Credit Distribution (hours/week)					Marks Distribution		
		L	T	P	CL	CR	IAC	ESE	Total
PTH7722	Physiotherapy in Neonatal and Paediatric Respiratory Care	1	2	-	-	3	50	50	100
PTH7724	Clinical practice in Neonatal and Paediatric Respiratory Care	-	-	-	36	12	50	50	100
PTH7780	Research Project in Paediatrics	-	-	10	-	5	50	50	100
	Total	**1**	**2**	**10**	**36**	**20**	**150**	**150**	**300**

Note:
PTH7722: will be conducted for 100 marks and normalized to 50 marks.
PTH7724: will be conducted for 100 marks and normalized to 50 marks.

SEMESTER - I

COURSE CODE	:	COURSE TITLE
ABS6101	:	Advanced Biostatistics & Research Methodology
PTH6001	:	Principles of Physiotherapy Practice
PTH6003	:	Clinical Practice in Physiotherapy
PTH6770	:	Research Proposal in Paediatrics

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Advanced Biostatistics & Research Methodology**
Course Code	**ABS6101**
Academic Year	First
Semester	I
Number of Credits	04
Course Prerequisite	Students should have basic knowledge of research and statistical tools
Course Synopsis	This course enables the student to understand the basics of research methods and design a research protocol for their research question. Additionally the course also enables the student to estimate sample size for their study, use statistical tests to analyse the results of the study and make meaningful interpretations.

Course Outcomes (COs): At the end of the course student shall be able to:	
CO1	Define the terms related to statistics and research methods (C1)
CO2	List and explain the research designs and sampling techniques (C2)
CO3	Explain, calculate and interpret the measures of central tendency (C4)
CO4	Determine sample size for the studies using means and proportions formula (C5)
CO5	Analyse and interpret the outputs of parametric and non-parametric tests (C4)

Mapping of Course Outcomes (COs) to Program Outcomes (POs):

COs	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**
CO1	x							
CO2	x					x		
CO3	x							
CO4	x						x	
CO5	x							

Course Content and Outcomes

Content	**Competencies**	**Number of Hours**
Unit 1	• Define statistics (C1) • List the uses of statistics in health science research. (C1) • Explain the role of Statistics in clinical and preventive Medicine. (C2) • Differentiate qualitative and quantitative variables with examples. (C3) • Differentiate discrete and continuous variables with	**4**

Content	Competencies	Number of Hours
	examples. (C4) • List the properties of various scales of measurement with example. (C1) • Define central tendency, measure of central tendency.(C1) • Define arithmetic mean, median and mode. List the properties, situation for use, and examples. (C1) • Determine the three measures from raw data. (C5)	
Unit 2		
	• Define and calculate quartiles and percentiles. (C4) • Define measures of dispersion (C1) • Define, calculate and interpret range, quartile deviation, interquartile range, standard deviation, variance and coefficient of variation.(C4) • Give the situation for the use of these measures (C2).	**4**
	• Describe the properties of Normal and Standard Normal Distribution with sketch (C2) • List the applications.(C1) • Calculate probabilities recollecting the coverage of the intervals mean±SD, , mean±2SD, mean±3SD (C4) • Define skewness and list the characteristics with sketch.(C1) • Define kurtosis and list the characteristics with sketch.(C1) • Define and differentiate parameter and statistic with examples (C4). • Define the basic terms-population, sample, sampling, parameter, statistic, estimate and estimator. (C1) • Define Point estimate (C1) • Define and Differentiate standard deviation and standard error (C4) • Define sampling distribution (C1) • Describe the importance of sampling distributions of different statistics.(C2) • Determine the sampling distribution of sample mean, sample proportion, difference between two means, difference between two proportions (Large sample approximation (CLT).(C5) • Calculate the standard error of mean, proportion, difference between two means, and difference between two proportions. (Large sample approximation (CLT). (C4)	**5**
	• Construct and interpret confidence interval for mean, difference between two means, proportion, difference between two proportions (large sample approximation)	**3**

Content	Competencies	Number of Hours
	(C5)	
Unit 3:		
	• Define /explain with example the concept of null hypothesis, alternative hypothesis, type I and type II errors. (C2) • Define level of significance, power of the test and p-value (C1) • Explain the difference between one sided and two-sided test (C2) • Give the situation for non-parametric tests. (C2) • List the differences, merits and demerits of non-parametric over parametric tests. (C1)	**4**
	• Explain the situation, hypothesis tested, assumptions and example for paired and unpaired t-test. (C2) • Interpret the output of paired and unpaired t-test (C4) • Explain the situation, hypothesis tested, assumptions and example for one-way and repeated measures ANOVA (C2)	**3**
	• Explain the situation, hypothesis tested, assumptions and example for : Mann-Whitney U-test, Wilcoxon signed rank test, Kruskal-Wallis ANOVA and Friedman's ANOVA (C2) • Explain the situation, hypothesis tested, assumptions and example for Chi square test association/independence and McNemar's test for association (C2) Computation and interpretation of chi-square test (2 x2 table) and McNemar's test result (C2)	**4**
	• Give example for positive and negative correlations. (C2) • Explain different types of correlation with the help of scatter diagrams. (C2) • Give the assumptions, properties, and interpretation of correlation coefficient.(C4) • Explain the situation for the computation of Pearson's and Spearman's correlation coefficient. (C2) • Interpret coefficient of determination.(C4) • Explain the situation, example, application and assumptions for linear and multiple regression.(C2) • Interpret regression coefficients in simple and multiple regression.(C4) • Explain the need for sample size computation.(C2) • Given the situation/ingredients, should be able to determine sample size for estimating mean and proportion, testing of difference in means and	**4**

Content	Competencies	Number of Hours
	proportions of two groups.(C5)	
	• Explain the difference between rate, ratio, and proportion with example. (C2) • Calculate rate, ratio, and proportion (C4) • Define and calculate Incidence and prevalence rates.(C4) • Explain the design, merits and demerits of Case report, case series analysis, prevalence studies and ecological studies with example (C2)	**3**
	• Explain the design, analysis (2x2 table and odds ratio), merits and demerits ((unmatched and 1:1 matched design) of case control study with example.(C2) • Explain the design, analysis (2x2 table and relative risk), merits and demerits of cohort study with example.(C2)	**3**
	• Explain confounding with example. (C2) • List the methods to deal with confounding at design and analysis stage.(C1) • Explain the design, analysis, merits and demerits of RCT with example. (C2) • Explain the need of simple, block and stratified randomization with example.(C2) Explain the need and type of blinding with example (C2)	**4**
	Explain the situation for the use of logistic regression and survival analysis with example.(C2)	**3**
	• Define Population, sample, sampling, and sampling frame. Give one example each.(C1) • List the characteristics of a good sample.(C1) • Differentiate and list the advantages and disadvantages of random and non- random sampling techniques.(C4) • Explain simple, stratified, systematic, cluster and multistage random sampling techniques with examples. List the merits and demerits of each of them.(C2) • Explain Convenience, quota, judgment and snowball sampling with examples. List the merits and demerits of each of them.(C2) Explain the difference between sampling and non-sampling errors. Give example for sampling and non-sampling errors. List the methods to minimize these errors.(C2)	**4**
	• Define Sensitivity, specificity, PPV and NPV. (C1) • Explain with example method of computation and interpretation. (C4) • Explain with example, the situation for the application of	**4**

Content	Competencies	Number of Hours
	Bland Altman plot, Kappa statistic. (C2) • Explain the interpretation of Kappa Statistics. (C2) • Explain the format of various research documents. (C2)

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Principles of Physiotherapy Practice**
Course Code	**PTH6001**
Academic Year	First
Semester	I
Number of Credits	03
Course Prerequisite	Students should have basic knowledge and skills in physiotherapy practice
Course Synopsis	The course will provide information about principles of evaluation and management of people with musculoskeletal, neurological, cardiorespiratory, paediatric, women health and geriatric disorders to apply basic and applied sciences in the evaluation and management. This course will also help the students to gain insights regarding standards of physiotherapy practice in the institution and community healthcare settings. This course will be delivered in the form of lectures, tutorials, and self-directed learning. Theory examination will be used to assess the students' transferable skills and the learning outcomes.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Outline the guidelines for standards of physiotherapy practice (C4)
CO2	Explain disability, models of disability and disability evaluation (C4)
CO3	Explain the biomechanics, physiology and control of human movement (C4)
CO4	Outline the principles of physiotherapy evaluation and treatment in various diseases and disorders relevant to physiotherapy practice (C4)
CO5	Explain the process of clinical reasoning and decision making in physiotherapy practice (C4)

CO5	x					x		

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Standards of physiotherapy practice	1. Outline the national and international guidelines for standards of physiotherapy practice (C4)	01
Unit 2		
Disability and evaluation	1. Explain disability (C4) 2. Distinguish between different models of disability (C4) 3. Explain disability evaluation (C4)	02
Unit 3		
Development of Posture and Movement across life span	1. Explain the development of postural control across life span (C4) 2. Explain the development of movement across life span (C4) 3. Explain the development and maturation of reflexes (C4)	02
Unit 4		
Biomechanics	1. Outline the biomechanics of TMJ, Joints of Thorax, Spine and Pelvis, Joints of Upper and Lower Extremity (C4)	01
Unit 5		
Exercise Physiology	1. Explain the acute responses and chronic adaptations to exercise (C4) 2. Explain the principles of exercise testing and prescription (C2)	03
Unit 6		
Pain	1. Explain the physiology of pain (C4) 2. Distinguish between different mechanisms of pain control (C4) 3. Categorize the strategies of pain management (C4) 4.	01
Unit 7		
Neurophysiology of balance, coordination and locomotion	1. Explain the neurophysiology of balance and coordination (C4) 2. Explain the neurophysiology of locomotion (C4)	02
Unit 8		
Theories of Motor control and Motor	1. Explain motor control (C4) 2. Compare and contrast between different	02

Content	Competencies	Number of Hours
Learning	theories of Motor control (C4) 3. Explain motor learning and theories of Motor Learning (C4)	
Unit 9		
Principles of physiotherapy evaluation	1. Outline the principles of musculoskeletal, neurological, and cardiopulmonary evaluation (C4) 2. Outline the special considerations for physiotherapy evaluation in children, women and older adults (C4) 3. Outline the evaluation protocols for physical fitness (C4) 4. Explain the principles of diabetic foot examination (C4)	08
Unit 10		
Gait	1. Distinguish between normal and pathological gait (C4) 2. Explain the methods of gait analysis (C4)	01
Unit 11		
Principles and applications of Electrodiagnosis	1. List the electrodiagnostic methods (C4) 2. Explain the principles of electrodiagnostic testing methods (C4) 3. Outline the clinical applications of electrodiagnostic methods (C4)	01
Unit 12		
Outcome Measures in Physiotherapy	1. Categorize the outcome measures based on body structure and function, activity and participation domains of ICF (C4) 2. Explain the psychometric properties of commonly used outcome measures (C4) 3. Explain the method of administration and interpretation of commonly used outcome measures (C4)	03
Unit 13		
Clinical investigations relevant to Physiotherapy practice	1. Choose the clinical investigations relevant to Physiotherapy practice (C3): Imaging; Biochemical; Electrophysiological; and systemic functional tests 2. Interpret the findings in clinical investigations relevant to Physiotherapy practice (C2)	02
Unit 14		
Physiotherapy treatment approaches	1. Outline the principles of physiotherapy treatment approaches including manual therapy, neurological, paediatric and	02

Content	Competencies	Number of Hours
	cardiopulmonary rehabilitation (C4)	
Unit 15		
Therapeutic electrophysical agents	1. Categorize therapeutic electrophysical agents (C4) 2. Explain the physiological and therapeutic uses, applications and rationale of electrophysical agents (C4)	01
Unit 16		
Community Based Rehabilitation	1. Explain the principles of Community Based Rehabilitation (C4)	01
Unit 17		
Clinical Reasoning / clinical decision making in physiotherapy practice	1. Outline the models of clinical reasoning (C2) 2. Explain the processes involved in clinical decision making (C2) 3. Explain the principles of evidence based practice in physiotherapy (C2)	02
Unit 18		
Universal Precautions	1. Apply the universal precautions for infection control in physiotherapy practice (C3)	01
Unit 19		
Wound care	1. Explain the principles of tissue healing & physiotherapy assessment and management for wound care (C4)	01
Unit 20		
Prosthetics and Orthotics	1. Explain the principles of prosthetic and orthotic prescription (C4) 2. List the types, uses, advantages and disadvantages of upper limb, lower limb and spinal orthosis and prosthesis (C4)	02

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Clinical Practice in Physiotherapy**
Course Code	**PTH6003**
Academic Year	First
Semester	I
Number of Credits	12
Course Prerequisite	Students should have basic knowledge and skills in Physiotherapy practice
Course Synopsis	The course will provide information about principles of evaluation and management of people with musculoskeletal, neurological, cardiorespiratory, paediatric, women health and geriatric disorders to apply basic and applied sciences in the evaluation and management. This course will also help the students to gain insights regarding standards of physiotherapy practice in the institution and community healthcare settings. This course will be delivered in the form of practical demonstrations, tutorials, self-directed learning, problem based learning and case based learning. Practical examination will be used to assess the students' transferable skills and the learning outcomes.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Perform physiotherapy assessment and evaluation in people with diseases and disorders (C4, P4, A2)
CO2	Perform physiotherapy techniques in people with diseases and disorders to improve health and wellbeing (C4, P4, A2)
CO3	Recognize and relate the processes involved in clinical decision making in physiotherapy evaluation and treatment (C4, P1, A1)
CO4	Follow ethical and professional behavior (Autonomy, beneficence, justice) during clinical practice and demonstrates the ability to work as a team (A3)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

COs	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**

CO3		x				x		
CO4		x		x				

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Physiotherapy evaluation in clinical practice	1. Perform musculoskeletal, neurological, and cardiopulmonary physiotherapy evaluation (C4, P4, A2) 2. Explain the special considerations for physiotherapy evaluation in children, women and older adults and display the assessment techniques (C4, P3, A1) 3. Explain the evaluation protocols for physical fitness and measure physical fitness (C4, P3, A1) 4. Explain and demonstrate the components of diabetic foot examination (C4, P2, A1) 5. Explain the methods of analysis and perform posture, balance and gait evaluation (C4,P4, A1) 6. Examine pain and perform pain assessment (C4, P4, A2) 7. Explain and demonstrate the components of physiotherapy assessment in wound care (C4, P2, A1) 8. Choose the outcome measures based on Impairment, activity and participation domains of ICF in the clinical practice (C4, P1, A1) 9. Discuss and display the method of administration of the commonly used outcome measures and interpret it (C4, P3, A1) 10. Choose the clinical investigations relevant to Physiotherapy practice (C3, P1, A1): Imaging; Biochemical; Electrophysiological; and systemic functional tests 11. Identify and interpret the findings in clinical investigations relevant to Physiotherapy practice (C2, P1, A1) 12. Recognize and relate the processes involved in clinical decision making in physiotherapy evaluation (C4, P1, A1) 13. Explain health related information with clients, caregivers, peers and health care professionals and demonstrates the ability to work as a team during evaluation (C4, P5, A3) 14. Demonstrate ethical and professional	234

Content	Competencies	Number of Hours
	behavior (Autonomy, beneficence, justice) during physiotherapy evaluation (A3)	
Unit 2		
Physiotherapy management in clinical practice	1. Perform physiotherapy techniques in clinical practice including musculoskeletal, neurological, and cardiopulmonary rehabilitation (C4, P4, A2) 2. Explain the special considerations for physiotherapy management in children, women and older adults and display the treatment techniques (C4, P3, A1) 3. Explain the protocols for maintaining and improving physical fitness (C4, P2, A1) 4. Explain the principles of diabetic foot management (C4, P2, A1) 5. Explain the principles of posture, balance and gait rehabilitation and perform treatment techniques to train posture, balance and gait (C4, P4, A1) 6. Categorize and perform the strategies of pain management (C4, P4, A2) 7. Display the method of application of therapeutic electrophysical agents in the clinical practice (C4, P4, A1) 8. Explain the principles of physiotherapy management in wound care (C4, P2, A1) 9. Follow the universal precautions for infection control in physiotherapy practice (C3, P3, A1) 10. Recognize and relate the processes involved in clinical decision making in physiotherapy management (C4, P1, A1) 11. Explain health related information with clients, caregivers, peers and health care professionals and demonstrates the ability to work as a team during treatment (C4, P5, A3) 12. Demonstrate ethical and professional behavior (Autonomy, beneficence, justice) during treatment (A3)	234

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Research Proposal in Paediatrics**
Course Code	**PTH6770**
Academic Year	First
Semester	I
Number of Credits	02
Course Prerequisite	Students should have basic knowledge in research methodology
Course Synopsis	The course is designed to have the student understand the nuances in developing and presenting a research protocol. It will facilitate the student to inculcate skills essential to the identification of a research gap of clinical relevance through a systematic literature search. This course will facilitate the application of research methodology towards the development of a research plan and the use of appropriate outcomes to prove the hypothesis. The course will also equip the student with the knowledge on scientific approvals required prior to initiation of the study in accordance to current regulations for the conduct of the research project.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Demonstrate literature search and develop need for the study (C5, P5)
CO2	Prepare a research proposal and justifies its rationale (C5, P4, A3)

Mapping of Course Outcomes (COs) to Program Outcomes (POs):

Course Content and Outcomes

Content	**Competencies**	**Number of Hours**
Unit 1		
Formulation of research question	1. Prepare search strategy and demonstrate Literature Search (C5, P5) 2. Critically appraise the literature, identify research gap and need for the study (C3, P4)	10

Content	Competencies	Number of Hours
Unit 2		
Method selection	1. Choose appropriate study design for the research question (C5, P1) 2. Organize procedural steps for implementing the study (C3, P4)	08
Unit 3		
Outcome measures	1. Choose appropriate outcome measure based on research question and psychometric properties (C5, P1) 2. Comply with the process of obtaining permission to use outcome measures from sources/ developers (A2)	08
Unit 4		
Research proposal document	1. Prepare a research proposal document (P4) 2. Choose appropriate statistical tools and tests (C5)	13
Unit 5		
Scientific Approvals	1. Proposes research protocol to relevant scientific committee(s) (P5, A3) 2. Justifies the need and rationale for the study to the committee (C5,P4, A3)	13

Course Prerequisite	NIL
Course Synopsis	The ethics module will help the post graduate students in understanding the ethical principles, identifying the ethical issues and resolving ethical dilemmas in their professional practice with specific focus on clinical and research ethics. The pedagogy of the module will help the post graduate students in understanding the educational philosophy, teaching learning methods and learners' assessment. This module will be delivered in the form of didactic lectures in workshop format and small group learning tutorials, seminars, demonstrations during practical sessions, problem based learning & self-directed learning. Theory examination, assignments and demonstrations will be used to assess the student's transferable skills and learning outcomes.

Course Outcomes (COs): At the end of the course student shall be able to:	
CO1	Apply ethical principles in clinical and research practice (C3)
CO2	Analyse ethical issues and resolve ethical dilemmas (C4)
CO3	Integrate principles of adult learning and various roles of teacher in their academic practice (C2)
CO4	Apply various teaching learning methods (C3, P4)
CO5	Assess students' achievements based on learning outcomes (C3)

Mapping of Course Outcomes (COs) to Program Outcomes (POs):

Course Content and Outcomes:

Content	Competencies	Number of Hours
Unit 1: Ethics		
Principles of ethics History and evolution of ethics - Helsinki declaration; Nuremberg Code; Principles of ethics and its importance - Autonomy, Beneficence, Non-maleficence, Justice	1. Outline the history and evolution of bioethics (C2) 2. Explain the cardinal principles of bioethics (C2) 3. Apply national and international bioethical principles (C3)	2
Ethics in professional practice Principles of practice in respective profession. Privacy, confidentiality, shared decision making, informed consent, equality and equity, justice	1. Outline the principles of ethics in professional practice - clinical, research, academics, administrative domains (C2) 2. Apply the principles of ethics in professional practice (C3)	
ICMR Guidelines General principles, Responsible conduct of research, Risk benefit assessment	1. Outline the general principles of ethics for conduct of research based on ICMR guidelines (C2) 2. Summarize the characteristics for responsible conduct of research (C2) 3. Identify potential ethical issues based on risk benefit analysis (C3)	3
Informed Consent Process Components of informed consent document, Procedure in obtaining informed consent, Special situations, waivers, and proxy consent	1. Explain the components and procedures of informed consent process (C2) 2. Apply suitable methods in obtaining informed consent (C3) 3. Distinguish special considerations of informed consent process for waivers and proxy consent (C4)	
Roles and Responsibilities of IEC Ethical Review process, Classification of projects for review, Roles and responsibilities of members, Communications with investigators and authorities	1. Outline the process of ethical review of research proposals (C2) 2. Relate the types of review based on the research project proposals (C2) 3. Summarize the roles and responsibilities of IEC and its members (C2) 4. Organize the mock ethical review meeting (C3) and examine the research proposal for ethical issues (C4)	2

Content	Competencies	Number of Hours
Ethics in Special and Vulnerable Populations Types of Vulnerability and vulnerable population, Challenges for research in vulnerable population, Guidelines for research in special and vulnerable population	1. Define and explain the types of Vulnerability (C2) 2. Outline the characteristics of special and vulnerable population (C2) 3. Summarize the challenges for research in vulnerable population (C2) 4. Apply the ICMR guidelines for research in special and vulnerable population (C3)	2
Conflict of Interest Definition and Types of Conflict of Interest, Identifying, mitigating and managing Conflict of Interest, Conflicts of interest in international collaborations	1. Define and explain the types of Conflict of Interest (C2) 2. Identify and solve potential Conflict of Interest (C3)	3
Publication Ethics Importance of publishing, Authorship guidelines according to ICMJE, Plagiarism	1. List the importance of publishing scholarly works (C4) 2. Examine the criteria of authorship based on ICMJE guidelines (C4) 3. Test the publication for plagiarism (C4)	
Unit 2: Pedagogy		
Principles of adult learning Systems approach in education; Curriculum - Definition, Components, Types of Curriculum (Outcomes-based, Competency-based, Performance-based, Objectives-based), Curricular alignment, Integrated Curriculum, Frameworks, Models (Harden's SPICES model) and approaches (problems-based learning, case-based learning).	1. Relate 'Systems Approach' in education (C2) 2. Define and explain the components of curriculum (C2) 3. Outline the types of curricular frameworks (C2) 4. Identify the characteristics of curricular frameworks (C3)	2
Taxonomy of learning Blooms Taxonomy: Knowledge, Psychomotor	1. Classify domains of learning (C2) 2. Distinguish the levels of mastery for each learning domains (C4)	2

Content	Competencies	Number of Hours
and Affective domains, Specific Learning Objectives - Elements, construction, mapping of SLOs to course outcomes.	3. Outline the elements of specific learning objectives (C3) 4. Organize specific learning objectives based on domains of learning (C3)	
Teaching Methods Small Group Teaching: Group dynamics, Categories of SGT, Facilitating techniques, Generic & Specific SGT methods Large Group Teaching: Lectures	1. Outline small group teaching methods (C3) 2. Explain the generic and specific methods of small group teaching (C3) 3. Outline large group teaching methods (C3) 4. Explain the facilitation methods in large group lectures (C3) 5. Perform microteaching (P4)	5
Learner Assessment Principles, Characteristics and Types of assessment - Formative/Summative, Tools, Blueprinting	1. Outline the principles, characteristics and types of assessment (C3) 2. Identify appropriate tools for assessment. (C3) 3. Construct a blueprint of assessment for theory and practical exam (C3)	5
	Total	**26**

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Foundations of Physiotherapy in Paediatrics**
Course Code	**PTH6702**
Academic Year	First
Semester	II
Number of Credits	03
Course Prerequisite	Students should have basic knowledge in applied anatomy, physiology and normal developmental process
Course Synopsis	The module is designed to provide basic understanding of normal growth and development and its implications on physical, intellectual, social and emotional well-being of children. It will help learners in understanding and interpreting the paediatric diagnostics. The module will lay emphasis on national health programs for children and ethical issues in paediatric rehabilitation.

Course Outcomes (COs):
At the end of the course student shall be able to:

CO1	Enumerate the basic genetics and embryological development (C2)
CO2	Explain the principles of normal growth and development (C2)
CO3	Discuss the principles and theories of motor control, motor learning and skill acquisition (C2)
CO4	Interpret the antenatal and paediatric investigations (C2)
CO5	Evaluate the motor developmental domain and identify developmental delays (C4)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Basic concepts of Human Genetics	1. Outline the basic principles of Genetics (C2) 2. Explain the details of transcription, translocation and mutation (C2)	2
Unit 2		
Basic Embryology - Development of organ systems	1. Outline the basic embryological development (C2) 2. Explain the intrauterine development of the nervous system and the cardiopulmonary system (C2) 3. Illustrate the implications of interruption of normal embryological development (C2)	2
Unit 3		
Physical Growth Characteristics	1. Explain the anthropometric changes from birth through adolescence (C2) 2. Illustrate the implications of delay in the normal development of growth characteristics (C4)	2
Unit 4		
Principles of Normal Growth and Development	1. Outline the principles of normal development (C2) 2. Illustrate the developmental theories (C2)	2
Unit 5		
Principles and theories of Motor control, Motor Learning and Skill Acquisition	1. Outline the theories and principles of motor control (C2) 2. Explain the implications of the theories towards normal growth and development (C2)	3
Unit 6		
Posture and movement acquisition in children	1. Outline the developmental milestones (C2) 2. Analyze the typical development of a child based on the developmental domains (C4) • Motor development • Somato-sensory development • Speech / language development • Psychosocial development • Oro-motor development • Perceptive-cognitive development	4

Content	Competencies	Number of Hours
	• Play behavior	
Unit 7		
Developmental Reflexes	1. Outline the developmental reflexes and the normal span of integration of the reflexes (C2) 2. Explain the spatiotemporal and physical organisation of developmental reflexes (C2) 3. Infer the implications of normal integration and delay in the integration of the reflexes (C4)	3
Unit 8		
Developmental evaluation	1. Evaluate the developmental domains and identify developmental delays (C4) 2. Develop a rehabilitation plan based on ICF domains (C3)	5
Unit 9		
Antenatal/Biochemical investigations performed during Antenatal period and Labour	Outline investigations performed in the Antenatal period and during Labour (C2) **Investigations during antenatal period-** • Dual Markers • Tripple test • Glucose Challenge & Tolerance Test • Biophysical Profile • Amniocentesis • Chronic Villi Sampling • Fetal echocardiography **Investigations during labour** – • Partogram Non-Stress Test	2
Unit 10		
Basics of Paediatric investigations:	Outline the different Paediatric investigations (C2) • Blood parameters • Radiographs • Magnetic Resonance Imaging & Computed Tomography • Pulmonary Function Tests • Echocardiography • Diagnostic tests for Genetic disorders	2
Unit 11		
Pharmacological management in	1. Outline the pharmacological management for variation in tone,	2

Content	Competencies	Number of Hours
paediatrics	seizures, asthma and other cardiopulmonary conditions (C2) 2. Interpret the implications of dosage regulation depending on the condition (C2)	
Unit 12		
Indian Public health initiatives for child health	Explain the Public Health Initiatives for child health (C2) • National immunization program • Sarva Shiksha Abhiyan(SSA) • Rashtriya Bal Swasthya Karyakram(RBSK)	1
Unit 13		
Ethical issues in Paediatric Rehabilitation	1. Outline the guidelines for research in children (C2) 2. Explain the concept of consent and assent (C2)	1
Unit 14		
Safety and infection control in neonatal and paediatric intensive care units	1. Explain the infection control practices and safety while working in the neonatal and paediatric Intensive Care Units (C2) 2. Outline the steps followed for Universal precautions (C2)	1
Unit 15		
Paediatric Basic Life Support	Explain the steps involved in Paediatric Basic Life Support (C2)	1
Unit 16		
Parental education	1. Explain the importance of parental education (C2) 2. Outline the core components and importance of Family Centred Care (C2)	2

Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Physiotherapy Clinical Practice in Paediatrics - I**
Course Code	**PTH6704**
Academic Year	First
Semester	II
Number of Credits	12
Course Prerequisite	Students should have basic knowledge in applied anatomy, applied physiology and physiotherapeutic skills.
Course Synopsis	This module is designed to apply fundamental and advanced knowledge in therapeutic sciences. Demonstrate comprehensive assessment techniques and interpret findings. Formulate and prescribe specific treatment plan. Monitor and re-evaluate treatment plans. Communicate effectively in verbal and written forms with patients, their family/caregiver, peers, healthcare professionals and the stakeholders at large

Course Outcomes (COs):
At the end of the course student shall be able to:

CO1	Analyse the normal development process and reflex maturation phases (C4, P5, A3)
CO2	Perform a detailed developmental evaluation of a child (C5, P5, A3)
CO3	Apply and choose an appropriate outcome measure for the evaluation and management of different Paediatric conditions (C3, P5, A3)
CO4	Practice basic life support and infection control practices (C5, P5, A3)
CO5	Practice ethical principles during assessment and treatment of children (C5, P6, A4)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Physiotherapy evaluation in Pediatric conditions	1. Demonstrate the assessment of primitive reflexes and righting reactions in newborn and infants. (C4, P5, A3) 2. Justify and analyse the developmental milestones underlying the reflex maturation of brainstem and subcortical structures: (C4, P5, A3) 3. Demonstrate the domains of developmental evaluation (C5, P5, A3) 4. Analyze the typical development of a child based on developmental domains (C4, P5, A3) 5. Perform the specialized assessment methods for the neuromuscular, musculoskeletal and cardiopulmonary system (C5, P5, A3) 6. Choose outcome measures relevant to neonate, infant and children with neuromuscular, musculoskeletal and cardiopulmonary disorders (C3, P5, A2) 7. Demonstrate the assessment of physical characteristics in children (C4, P5, A3) 8. Interpret relevant maternal and pediatric investigations (C4, P5, A4) 9. Demonstrate the clinical reasoning and decision-making process for organizing the problem list and plan for management of pediatric conditions (C5, P5, A3) 10. Use culturally appropriate and playful communication with child and friendly communication with parent/caregiver while interviewing children (C5, P6, A4) 11. Discuss health related information with parents, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 12. Display ethical and professional behaviour (Autonomy, Beneficence and Justice) during evaluation (A4)	312
Unit 2		
ICF framework based outcome measures in Pediatric rehabilitation	1. Identify the psychometric properties of validated clinical outcome measures (C3, P5, A2) 2. Choose and apply the impairment-based outcome measures used in pediatric conditions (C3, P5, A2)	78

Content	Competencies	Number of Hours
	3. Choose and apply the activity-based outcome measures used in pediatric conditions (C3, P5, A2) 4. Choose and apply the participation-based outcome measures used in pediatric conditions (C3, P5, A2) 5. Discuss health related information with clients, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 6. Display ethical and professional behavior (Autonomy, Beneficence and Justice) during evaluation (A4)	
Unit 3		
Clinical decision-making process for the management of pediatric disorders for e.g., Hypothesis-Oriented Algorithm for Clinicians II (HOAC)	1. Plan a comprehensive physical examination, demonstrate the Hypothesis-Oriented Algorithm for Clinicians II (HOAC) in making a clinical decision for management of pediatric disorders (C3, P5, A3) 2. Construct problem list and plan short term and long-term goals based on the evaluation findings (C3, P5, A3) 3. Determine the factors affecting the recovery, and also identify the predictors of recovery prognosis (C3, P5, A3) 4. Plan specific physiotherapy treatment techniques underlying the principles of motor control, learning and brain plasticity in pediatric conditions (C3, P5, A3) 5. Organize selecting and revising the treatment regime according to the recovery prognosis of the child (C3, P5, A3) 6. Discuss health related information with clients, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 7. Displays ethical and professional behavior (Autonomy, Beneficence) and Justice) during evaluation (A4)	78

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Research Progress in Paediatrics - I**
Course Code	**PTH6780**
Academic Year	First
Semester	II
Number of Credits	02
Course Prerequisite	Students should have basic knowledge for the application of research methodology for the project
Course Synopsis	The course is designed to ensure the student is aware of the proper methods of data collection, monitoring and obtaining necessary documentation related to the study (i.e., informed consent). The course will facilitate certification in Good Clinical Practice to ensure research is conducted in accordance to the current regulations and requirements. The course will also motivate the student stay up-to-date with the research in the area of study through regular updates of the literature review.

Course Outcomes (COs) At the end of the course student shall be able to**:**	
CO1	Explain and demonstrate good clinical practice during research (P5, A3)
CO2	Demonstrate data collection procedures and document maintenance (P4, A4)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Physiotherapy in General Paediatrics**
Course Code	**PTH7701**
Academic Year	Second
Semester	III
Number of Credits	03
Course Prerequisite	Students should have basic knowledge in applied anatomy, physiology and physiotherapeutic skills in Paediatrics
Course Synopsis	This module is designed to help students have an advanced understanding of developmental milestones and play behavior. It will also detail the common musculoskeletal, cardiopulmonary and neurological conditions in children. The module will lay emphasis on detailed developmental assessment and physiotherapy management of children with musculoskeletal, cardiopulmonary and neurological conditions.

Course Outcomes (COs):
At the end of the course student shall be able to:

CO1	Outline the pathophysiology and describe the clinical features in Paediatric disorders (C2)
CO2	Examine the assessment procedures and evidence based physiotherapy interventions and rehabilitation of children with musculoskeletal, neurological and cardiopulmonary disorders (C4)
CO3	Distinguish the theoretical framework and clinical practice of traditional and modern neuro-physiotherapy approaches and cardiopulmonary physiotherapy techniques (C4)
CO4	Analyze the rationale, analysis and performance of fitness testing protocols and exercise prescription for children (C4)

Mapping of Course Outcomes (COs) to Program Outcomes (POs):

CO2	x					x		
CO3	x					x		
CO4	x					x		

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Newborn / developmental surveillance and screening	1. Classify the outcome measures based on the ICF framework (C1) 2. Explain the test administration and psychometric properties of the outcome measures (C2) 3. Choose appropriate outcome measure for target population and age group (C3) • Milani - Comparetti Motor Development Screening Test • Denver II Development Screening Test • Comprehensive Developmental Scales. 4. Gessell Developmental schedules 5. Bayley scales of Infant Development 6. Neonatal Behavioral Assessment Scale • Neurological Examination of Full Term New Born Infant • Brazelton Neonatal Behavioral Assessment Scale • Neurological Assessment of Preterm & Full Term Infant by Dubowitz & Dubowitz • Movement Assessment of Infants • Test of Infant Motor Performance and Development • Alberta Infant Motor Scale • Infant Neonatal International Battery (INFANIB) • Gross Motor Performance Measures • Peabody Developmental Motor Scales • Bruininks-Oseretsky Test of Motor Proficiency(BOTMP) • Gross Motor Function Measure (GMFM) • Paediatric Balance Scale (PBS) • Sensory Profile • Gillian Autism Rating Scale (GARS) • Assessment of Functional Capabilities • Paediatric Evaluation of Disability Inventory (PEDI) • Functional Independence Measure for Children (WeeFIM)	5
Unit 2		
Musculoskeletal assessment in	1. Classify the outcome measures based on the ICF framework (C1)	3

Content	Competencies	Number of Hours
Paediatrics	• Paediatric Pain Profile (PPP) • Edinburgh Visual Gait Score • Selective Control Assessment of the Lower Extremity (SCALE) • Gillette Functional Assessment Questionnaire • Selective motor control scale (SMC) • POSNA Paediatric Musculoskeletal Functional Health Questionnaire • Observational Gait Assessment (RANCHO LOS AMIGOS) 2. Explain the test administration and psychometric properties of the outcome measures (C2) 3. Choose appropriate outcome measure for target population and age group (C3)	
Unit 3		
Cardiovascular Exercise Testing- Endurance, strength, flexibility and body composition) through various methods in children **Sports performance evaluation** **Rationale for exercise prescription in children**	1. Outline the rationale for exercise testing, sports performance evaluation and exercise prescription in children (C1) 2. Illustrate the steps involved in various exercise testing and sports performance evaluation methods in children using the ACSM guidelines (C2) 3. Analyze and interpret the findings of the exercise testing (C2)	3
Unit 4		
Disorders of Musculo-skeletal system	1. Classify the Musculo-skeletal disorders in Paediatrics (C1) • Congenital Talipes Equino Varus (CTEV) • Idiopathic Scoliosis • Congenital anomalies - Hemimelia, Amelia • Osteogenesis Imperfecta • Arthrogryposis • Perthe's Disease	4

Content	Competencies	Number of Hours
	• Developmental Dysplasia of Hip (DDH) • Congenital Torticollis 2. Explain the etiology, pathophysiology and clinical features of Musculo-skeletal disorders (C2) 3. Outline the Medical and Surgical management of Musculo-skeletal disorders (C2) 4. Analyse the goals and its implications for the Physiotherapy management in Musculo-skeletal disorders (C4)	
Unit 5		
Disorders of Neurological system	1. Classify the Neurological disorders in Paediatrics (C1) • Cerebral palsy • Down syndrome • Spinal dysraphism • Traumatic Brain Injury (TBI) • Obstetric Brachial Plexus Injury (OBPI) 2. Explain the etiology, pathophysiology and clinical features of Neurological disorders (C2) 3. Outline the Medical and Surgical management of Neurological disorders (C2) 4. Analyse the goals and its implications for the Physiotherapy management in Neurological disorders (C4)	4
Unit 6		
Disorders of Cardiopulmonary system (Congenital and acquired)	1. Classify the Cardiopulmonary disorders in Paediatrics (C1) 2. Explain the etiology, pathophysiology and clinical features of Cardiopulmonary disorders (C2) 3. Outline the Medical and Surgical management of Cardiopulmonary disorders (C2) 4. Analyse the goals and its implications for the Physiotherapy management in Cardiopulmonary disorders (C4)	4
Unit 7		
Neuro-physiotherapy approaches in Paediatric Rehabilitation	1. Explain the theoretical framework for neuro-physiotherapeutic approaches (C2) • Roods approach • Bobath and Neuro Developmental Therapy (NDT)	5

Content	Competencies	Number of Hours
	• Proprioceptive Neuromuscular Facilitation (PNF) • Vojta concept • Sensory Integration Therapy (SI) • Myofascial Release (MFR) • Functional Electrical Stimulation • Technology based intervention(body weight support treadmill training, robotics, biofeedback and virtual reality) • Constraint Induced Movement Therapy • Aquatic therapy 2. Outline the principles and basic concepts of each neuro-physiotherapeutic approaches (C2) 3. Illustrate the rationale and use of neuro physiotherapy approaches in clinical practice (C2) 4. Analyse the clinical utility of the neuro-physiotherapeutic approaches for Paediatric conditions (C4)	
Unit 8		
Cardiopulmonary physiotherapy techniques treatment techniques	1. Explain the theoretical framework for cardiopulmonary physiotherapy approaches (C2) • Lung expansion therapy • Bronchial hygiene therapy/postural drainage • Humidification, Oxygen therapy, Nebulization 2. Outline the principles and basic concepts of each cardiopulmonary physiotherapy approaches (C2) 3. Illustrate the rationale and use of cardiopulmonary physiotherapy techniques in clinical practice (C2) 4. Analyse the clinical utility of the cardiopulmonary physiotherapy approaches for Paediatric conditions (C4)	2
Unit 9		
Oromotor Rehabilitation	1. Outline the applied anatomy and applied physiology of the oromotor development (C2) 2. Illustrate the pathophysiology, causes and the clinical features of oromotor dysfunctions (C2) 3. Infer the implications of different strategies	2

Content	Competencies	Number of Hours
	for Oromotor Rehabilitation (C4)	
Unit 10		
Early intervention strategies in paediatric rehabilitation	1. Outline the factors influencing infants for the risk of developmental delay (C2) 2. Illustrate the rationale for early intervention strategies in paediatric rehabilitation (C2) 3. Analyse the planning and implementation of early intervention programs (C4)	4
Unit 11		
Orthotic and Adaptive/Assistive aids	1. Outline the principles and design of orthotic devices and adaptive/assistive aids in Paediatric rehabilitation (C2) 2. Apply the principles for planning, prescription and training for use of orthotics and adaptive/assistive aids (C3)	2
Unit 12		
Physical Modalities in Paediatric Rehabilitation	1. Outline the indications, contraindications, therapeutic and physiological effects of physical agents used in Paediatrics (C2) 2. Analyse the rationale and the implications of use of physical modalities in Paediatrics (C4)	1
	Total	**39**

Academic Year	Second
Semester	III
Number of Credits	12
Course Prerequisite	Students should have basic knowledge in applied anatomy, applied physiology and physiotherapeutic skills in Paediatrics
Course Synopsis	This module is designed to – 1. Apply fundamental and advanced knowledge in therapeutic sciences 2. Demonstrate comprehensive assessment techniques and interpret findings 3. Formulate and prescribe specific treatment plan 4. Conduct a holistic and comprehensive treatment intervention safely and competently 5. Monitor and re-evaluate treatment plans 6. Use problem-solving principles and evidence-based practice in decision making of patient/client management 7.Identify the scope and limitations of professional practices, manage and refer appropriately 8.Communicate effectively in verbal and written forms with patients, their family/caregiver, peers, healthcare professionals and the stakeholders at large

Course Outcomes (COs):
At the end of the course student shall be able to:

CO1	Analyse and apply the principles of physiotherapy evaluation and management in Paediatric conditions (C4, P5, A3)
CO2	Demonstrate fitness testing protocols and exercise prescription for typical and atypically developing children and design a school-based exercise program for children (C2, P5, A3)
CO3	Apply validated outcome measures in the evaluation and management of children with musculoskeletal, neuromuscular and cardiopulmonary disorders (C3,P5,A2)
CO4	Demonstrate assessment procedures and evidence based physiotherapy interventions and rehabilitation of children with musculoskeletal, neurological and cardiopulmonary (C4,P5,A3)

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Physiotherapy assessment of musculo-skeletal, cardio-pulmonary and neurological disorders in children	1. Demonstrate the relevant assessment methods specific to the clinical presentation of the musculo-skeletal, cardio-pulmonary and neurological disorders in children (C3, P6, A4) 2. Choose and apply an appropriate outcome measure for musculoskeletal, cardiopulmonary and neurological disorders in children (C3, P3, A3) 3. Explain and demonstrate the administration, scoring and interpretation of the outcome measures (C6, P4, A3) 4. Evaluate and plan an evidence based physiotherapy assessment of children with oromotor dysfunction (C5, P5, A3) 5. Explain the rationale and choice of appropriate orthotic devices and adaptive/assistive aids for Paediatric conditions (C2,P4,A4) 6. Discuss health related information with clients, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 7. Display ethical and professional behaviour (Autonomy, Beneficence and Justice) during evaluation (A4)	156
Unit 2		
Physiotherapy management of musculo-skeletal, cardio-pulmonary and neurological disorders in children	1. Construct a structured exercise program for children with musculo-skeletal, cardio-pulmonary and neurological disorders (C3, P4, A3) 2. Apply evidence based practice for use of specific treatment approaches and techniques in children with musculo-skeletal, cardio-pulmonary and neurological disorders (C4,P5,A3) 3. Plan a detailed evidence based	234

Content	Competencies	Number of Hours
	Physiotherapy intervention program for management of oromotor dysfunction in Paediatric conditions(C5, P5, A3) 4. Plan a detailed evidence based early intervention program for children at risk of developmental delay (C5, P5, A3) 5. Apply appropriate handling techniques of the children; and educate the parent, and the family members in a friendly communicative manner (C3, P5,A3) 6. Describe the principles and foundations of management using orthotic devices and adaptive/assistive aids (C2,P4,A4) 7. Demonstrate training of parent for the use of orthotic devices and adaptive/assistive aids in Paediatric conditions (C3,P5,A3) 8. Discuss health related information with clients, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 9. Display ethical and professional behaviour (Autonomy, Beneficence and Justice) during evaluation (A4)	
Unit 3		
Exercise testing, exercise prescription and sports performance evaluation in Paediatrics	1. Explain the special considerations for exercise testing, prescription and sports performance evaluation in Paediatrics (C2, P4, A3) 2. Apply exercise testing (endurance, strength, flexibility and body composition) among children (C3, P4, A3) 3. Construct a structured exercise prescription for children (C3) 4. Plan a sports performance (speed, agility, balance, reaction time, coordination, power) evaluation protocol for children (C3, P4, A3)	78

Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Evidence Based Physiotherapy Practice in Paediatrics**
Course Code	**PTH7705**
Academic Year	Second
Semester	III
Number of Credits	02
Course Prerequisite	Students should have basic knowledge in evidence based Physiotherapy practice
Course Synopsis	The course will focus on the development of skill to search for evidence, appraise the available literature and apply the relevant evidence into clinical practice for the physiotherapy assessment and management of Obstetrics and gynecologic disorders. Through this course, students will learn to summarise recent trends and developments in Paediatrics (including assessment and treatment) by reviewing the scientific literature of the last 5-10 years while emphasizing on landmark studies, high levels of evidence, on-going controversies, on-going studies, and the way forward.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Appraise the process of evidence based practice and implementation to clinical practice (C5)
CO2	Appraise the process of evidence-based practice in obstetric and gynecological diseases across life span (C5)
CO3	Appraise the process of evidence-based practice lifestyle diseases (C5)

Number of Credits	03
Course Prerequisite	Students should have basic knowledge on Research Project
Course Synopsis	This course is developed to introduce the student to the art of scientific writing. Students will be facilitated to complete a required certification in scientific writing during this time and will be prepared to implement the knowledge from this course into writing their research project. This course will ensure that students continue to adhere to guidelines and good clinical practice recommendations related to enrolment, data collection and storage. The course will enhance the skill of the student to keep abreast with recent developments in the area of study through periodic literature updates.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Explain and components of scientific writing (C2, P2)
CO2	Demonstrate data collection procedures and document maintenance (P4, A4)
CO3	Perform literature search and update (P4)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

COs	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**
CO1	x	x						
CO2			x		x			
CO3		x				x		

Course Content and Outcomes

Content	**Competencies**	**Number of Hours**
Unit 1		
Basics of scientific writing	1. Explain the components of scientific writing in dissertation and manuscript (C2, P2)	08
Unit 2		
Data collection	1. Perform data collection according to the procedure approved by the approval committees (P5, A3)	39

Content	Competencies	Number of Hours
Unit 3		
Document maintenance	1. Obtain, organize and store the documents relevant to the study e.g. Informed Consent document, Ethical approvals, data collection forms (P4, A4)	06
Unit 4		
Literature update	1. Perform literature search and update the review (P4)	25
	Total	**78**

Learning Strategies, Contact Hours and Student Learning Time (SLT)

SEMESTER - IV

Option1: Elective in Paediatric Neurology

COURSE CODE	**:**	**COURSE TITLE**
PTH7712	**:**	**Physiotherapy in Paediatric Neurology**
PTH7714	**:**	**Clinical practice in Paediatric Neurology**
PTH7780	**:**	**Research project in Paediatrics**

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Physiotherapy in Paediatric Neurology**
Course Code	**PTH7712**
Academic Year	Second
Semester	IV
Number of Credits	03
Course Prerequisite	Students should have advanced knowledge in application of Paediatric physiotherapy skills
Course Synopsis	The module will help in understanding of brain growth and development and factors influencing it. It will describe in the detail the paediatric neurological conditions. The module will lay emphasis on detailed assessment and physiotherapy management of children with neurological conditions.

Course Outcomes (COs):
At the end of the course student shall be able to:

CO1	Explain the normal and abnormal growth and development across from birth to adolescence (C2)
CO2	Describe the pathophysiology and clinical features in paediatric neurological conditions (C2)
CO3	Outline the electrodiagnostic investigations and detailed physiotherapy assessment in paediatric neurological conditions (C2)
CO4	Summarize the implications of pharmacological management in clinical decision making (C2)
CO5	Plan a detailed evidence-based physiotherapy intervention program for paediatric neurological conditions (C5)

Mapping of Course Outcomes (COs) to Program Outcomes (POs):

COs	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**
CO1	x							
CO2	x					x		
CO3	x							
CO4	x							
CO5	x					x		

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Early brain development and developmental psychobiology	1. Explain the neurophysiology and neuroanatomy of early brain development (C2) 2. Summarize the developmental psychobiology during early stages of growth and maturation (C2)	2
Unit 2		
Physical growth & development in atypically developing children across lifespan	1. Explain the physical growth and motor development in atypically developing children across lifespan (C2) 2. Interpret the scores of outcome measures to discriminate the motor abilities of children (C5)	2
Unit 3		
Cerebral Palsy	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of Cerebral Palsy (C2) 2. Outline the medical and surgical management of children with Cerebral Palsy (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children with Cerebral Palsy (C4)	6
Unit 4		
Acute Brain Injury in Childhood	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of acute brain injury (C2) 2. Outline the medical and surgical management of children with acute brain injury (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children with acute brain injury (C4)	3
Unit 5		
Minimal Brain Dysfunction, Learning Disability,	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification (C2) 2. Outline the medical management (C2)	3

Content	Competencies	Number of Hours
Attention Deficit, Autism, Developmental Coordination Disorder Intellectual Disability	3. Analyze and plan an evidence-based physiotherapy assessment and management (C4)	
Unit 6		
Genetic Diseases with Emphasis on Down Syndrome and Inborn errors of metabolism	1. Explain the etiology, risk factors, pathophysiology and clinical presentation of children with Down Syndrome (C2) 2. Outline the medical and surgical management of children with Down Syndrome (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children with Down Syndrome (C4)	3
Unit 7		
Hydrocephalus	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of congenital Hydrocephalus (C2) 2. Outline the medical and surgical management of children with congenital Hydrocephalus (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children with congenital Hydrocephalus (C4)	3
Unit 8		
Neuromuscular Disorders in Childhood	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of neuromuscular disorders in children (C2) 2. Outline the medical and surgical management of neuromuscular disorders in children (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of neuromuscular disorders in children (C4)	3
Unit 9		
Brachial Plexus Injury	1. Explain the etiology(obstetric and traumatic), risk factors, pathophysiology	3

Content	Competencies	Number of Hours
	and clinical presentation based on the classification of obstetric brachial plexus injury (C2) 2. Outline the surgical management of obstetric brachial plexus injury (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of obstetric brachial plexus injury (C4)	
Unit 10		
Paediatric Brain and Spinal cord Tumors	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of paediatric brain and spinal cord tumors (C2) 2. Outline the medical and surgical management of paediatric brain and spinal cord tumors (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of paediatric brain and spinal cord tumors (C4)	3
Unit 11		
Electro-diagnosis in Paediatrics	1. Enumerate the common electrodiagnostic investigations related to Paediatric Neurological conditions (C1) • Electromyography • Nerve Conduction Studies • Evoked Potentials 2. Outline the instrumentation and procedure for electrodiagnostic testing (C2) 3. Relate the clinical presentation with the electrodiagnostic findings (C2)	2
Unit 12		
Adaptive Equipment assessment and prescription for Physically Challenged Children	Evaluate, plan and prescribe orthotic devices and adaptive/assistive aids in Paediatric neurological conditions (C5)	2
Unit 13		
Community Integration of children with disabilities	Explain the community reintegration of children with disabilities (C2)	2
Unit 14		
Pharmacological management in	1. Explain the pharmacological management for paediatric neurological	2

Content	Competencies	Number of Hours
paediatric neurological conditions	conditions (C2) 2. Summarize the implications of drug dosage on the clinical presentation (C4)	
	Total	**39**

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Physiotherapy evaluation in pediatric neurological conditions	1. Demonstrate the relevant assessment methods specific to the clinical presentation of the pediatric neurological conditions (C3, P6, A4) 2. Choose and apply an appropriate outcome measure for pediatric neurological conditions (C3, P3, A3) 3. Explain and demonstrate the administration, scoring and interpretation of the outcome measures (C6, P4, A3) 4. Explain the rationale and choice of appropriate orthotic devices and adaptive/assistive aids for pediatric neurological conditions (C2,P4,A4) 5. Discuss health related information with clients, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 6. Display ethical and professional behaviour (Autonomy, Beneficence and Justice) during evaluation (A4)	234
Unit 2		
Physiotherapy management in pediatric neurological conditions	1. Construct a structured exercise program for children with neurological conditions (C3, P4, A3) 2. Apply evidence based practice for use of specific treatment approaches and techniques in children with neurological disorders (C4,P5,A3) 3. Perform a detailed evidence based early intervention program for children at risk of developmental delay (C5, P5, A3) 4. Apply appropriate handling techniques of the children; and educate the parent, and the family members in a friendly communicative manner (C3, P5,A3)	234

Content	Competencies	Number of Hours
	5. Describe the principles and foundations of management using orthotic devices and adaptive/assistive aids (C2,P4,A4) 6. Demonstrate training of parent for the use of orthotic devices and adaptive/assistive aids in paediatric neurological conditions (C3,P5,A3) 7. Discuss health related information with clients, caregivers, peers and health care professionals and displays ability to work as a team (C3, P5, A3) 8. Display ethical and professional behaviour (Autonomy, Beneficence and Justice) during evaluation (A4)

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Research Project in Paediatrics**
Course Code	**PTH7780**
Academic Year	Second
Semester	IV
Number of Credits	05
Course Prerequisite	Students should have advanced knowledge in application of research methodology
Course Synopsis	This course is designed to facilitate the student to apply knowledge in Biostatistics to the data collected through data entry, data analysis and interpretation. The course will develop skills in the use of essential statistical software for the management and analysis of data. The course will also facilitate the application of knowledge of scientific writing into the final submission of the research project. The course will promote the student's ability to justify the study and its findings through both written and spoken methods. It will also sensitize the student to the process of developing a manuscript to a journal. The course will also expose the student to the guidelines on completion of a research project as per prevailing regulatory and institutional norms.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Perform data analysis and interpret results (C4, P4)
CO2	Prepare and submit dissertation document and manuscript (P4)
CO3	Present and defend dissertation (P4,A3)

Mapping of Course Outcomes (COs) to Program Outcomes (POs):

COs	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**

Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Physiotherapy in Neonatal and Paediatric Respiratory Care**
Course Code	**PTH7722**
Academic Year	Second
Semester	IV
Number of Credits	03
Course Prerequisite	Students should have advanced knowledge in application of Paediatric physiotherapy skills
Course Synopsis	The module will help in understanding development of cardiopulmonary system and factors influencing it. It will describe in the detail the neonatal and paediatric cardiopulmonary conditions. The module will lay emphasis on detailed assessment and physiotherapy management of children with musculoskeletal, cardiopulmonary and neurological conditions admitted in critical care unit.

Course Outcomes (COs):
At the end of the course student shall be able to:

CO1	Enumerate the stages in the intrauterine development of cardiopulmonary system (C2)
CO2	Explain the pathophysiology of neonatal and paediatric cardiopulmonary conditions (C2)
CO3	Outline the electrodiagnostic investigations and detailed physiotherapy assessment in paediatric cardiopulmonary conditions (C2)
CO4	Summarize the implications of pharmacological management in paediatric cardiopulmonary conditions for clinical decision making (C2)
CO5	Plan a detailed evidence-based physiotherapy intervention program for paediatric cardiopulmonary conditions (C5)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

CO4	x							
CO5	x					x		

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Cardiopulmonary system - Intrauterine development	1. Explain the intrauterine development of the cardiopulmonary system (C2)	2
Unit 2		
Genetics of Cardiopulmonary disorders	1. Outline the genetic basis of cardiopulmonary disorders (C2) 2. Explain the cardiopulmonary disorders related to genetic syndromes (C2)	3
Unit 3		
Assessment, monitoring, clinical reasoning and outcome measures in Neonatal and Paediatric intensive care	1. Outline the outcome measures used in neonatal and paediatric intensive care units (C2) 2. Summarize the advantages and disadvantages of the outcome measures (C2) 3. Explain the assessment and monitoring of neonates and children in the ICU (C2)	3
Unit 4		
Neonatal / Paediatric Cardiac conditions	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of neonatal/paediatric cardiac conditions (C2) 2. Outline the medical and surgical management in neonatal/paediatric cardiac conditions (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management in neonatal/paediatric cardiac conditions (C4)	3
Unit 5		
Neonatal /paediatric Respiratory Diseases	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of neonatal/paediatric respiratory diseases (C2) • Cystic Fibrosis • Respiratory distress Syndrome, • Bronco Pulmonary Dysplasia • Meconium Aspiration Syndrome • Neonatal /Congenital Pneumonia • Persistent pulmonary Hypertension of the newborn	4

Content	Competencies	Number of Hours
	• Bronchiolitis • Respiratory Tract Disorders • Parenchymal Lung Diseases • Tuberculosis • Asthma • Congenital Abnormalities of Chest 2. Outline the medical and surgical management in neonatal/paediatric respiratory diseases (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management in neonatal/paediatric respiratory diseases (C4)	
Unit 6		
Early intervention and High risk follow up clinic	1. Explain the etiology, risk factors, pathophysiology and clinical presentation (C2) 2. Outline the medical and surgical management of high risk infants (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of high risk infants (C4)	4
Unit 7		
Burns in Children	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of burns in children (C2) 2. Outline the medical and surgical management of children with burns (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children with burns (C4)	3
Unit 8		
Hematology / Oncology-Cancers, Immune Deficiency Syndrome	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification (C2) 2. Outline the medical and surgical management of children (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children (C4)	3
Unit 9		
Endocrine & Metabolic Disorders in Paediatrics	1. Explain the etiology, risk factors, pathophysiology and clinical presentation based on the classification of endocrine	3

Content	Competencies	Number of Hours
	and metabolic disorders in children(C2) 2. Outline the medical and surgical management of children with endocrine and metabolic disorders (C2) 3. Analyze and plan an evidence-based physiotherapy assessment and management of children with endocrine and metabolic disorders (C4)	
Unit 10		
Neonatal and paediatric cardio respiratory investigations and its implications for physiotherapy	1. Enumerate the common electrodiagnostic investigations related to paediatric cardiorespiratory investigations (C1) • Chest Radiographs • Pulmonary Function Tests • Echocardiography • Blood investigations 2. Outline the instrumentation and procedure for paediatric cardiorespiratory investigations (C2) 3. Relate the clinical presentation with the paediatric cardiorespiratory investigations (C2)	4
Unit 11		
Exercise prescription & training for Physical Fitness and sports performance in paediatrics	1. Apply the exercise prescription, physical fitness training and sports performance in paediatrics according to the ACSM guidelines (C3) • Typically developing children • Children with developmental disabilities	3
Unit 12		
Immunization programs for childhood respiratory infections	1. Explain the immunization programs for childhood respiratory conditions and the schedule for the same (C2)	2
Unit 13		
Pharmacological management in neonatal and paediatric cardiopulmonary conditions	1. Explain the pharmacological management for paediatric cardiopulmonary conditions (C2) 2. Summarize the implications of drug dosage on the clinical presentation (C4)	2

Manipal College of Health Professions	
Name of the Department	Physiotherapy
Name of the Program	Master of Physiotherapy (Paediatrics)
Course Title	**Research Project in Paediatrics**
Course Code	**PTH7780**
Academic Year	Second
Semester	IV
Number of Credits	05
Course Prerequisite	Students should have advanced knowledge in application of research methodology
Course Synopsis	This course is designed to facilitate the student to apply knowledge in Biostatistics to the data collected through data entry, data analysis and interpretation. The course will develop skills in the use of essential statistical software for the management and analysis of data. The course will also facilitate the application of knowledge of scientific writing into the final submission of the research project. The course will promote the student's ability to justify the study and its findings through both written and spoken methods. It will also sensitize the student to the process of developing a manuscript to a journal. The course will also expose the student to the guidelines on completion of a research project as per prevailing regulatory and institutional norms.

Course Outcomes (COs)
At the end of the course student shall be able to**:**

CO1	Perform data analysis and interpret results (C4, P4)
CO2	Prepare and submit dissertation document and manuscript (P4)
CO3	Present and defend dissertation (P4,A3)

Mapping of Course Outcomes (COs) to Program Outcomes (POs)

COs	**PO1**	**PO2**	**PO3**	**PO4**	**PO5**	**PO6**	**PO7**	**PO8**
CO1	x	x						
CO2						x	x	
CO3		x	x					

Course Content and Outcomes

Content	Competencies	Number of Hours
Unit 1		
Data compilation	1. Perform data entry and prepare for analysis in statistical software (P4)	26
Unit 2		
Statistical analysis	1. Perform appropriate statistical tests and interprets the results (C5,P4) is the student expected to do the analysis	13
Unit 3		
Dissertation and Manuscript writing	1. Prepare the dissertation document according to institutional guidelines (P4) 2. Prepares manuscript for submission to an indexed journal (P4)	52
Unit 4		
Dissertation presentation	1. Present and defend the dissertation to the relevant scientific committee(s) (P4, A3)	13
Unit 5		
Closure report	1. Complete requirements regarding closure of research project (P4)	26
	Total	**130**

Learning Strategies, Contact Hours and Student Learning Time (SLT)		
Learning Strategies	**Contact Hours**	**Student Learning Time (SLT)**
Small Group Discussion (SGD)	16	32

8. MCHP PG PROGRAM REGULATION

1. Program Structure

1.1. The program offers a semester based credit system (with few programs offering specialization too).

1.2. An academic year consists of two semesters – Odd semester (July - December) and Even semester (January – June)

1.3 Each semester shall extend over a minimum period of 13 weeks of academic delivery excluding examination days, semester breaks, declared holidays and non-academic events.

1.4 Medium of instruction shall be in English

2 Credit Distribution

2.1 Each semester has minimum 13 weeks of contact sessions. One credit = 13 hours. The credit distribution hours for Lecture, Tutorial, Practical, Clinics and Project are as follows:

Lecture (L)	:	1 Hour /week = 1 credit
Tutorial (T)	:	1 Hour /week = 1 credit
Practical/Project (P/PR)	:	2 Hours/week = 1 credit
Clinics (CL)	:	3 Hours/week = 1 credit

2.2 A semester has courses structured as theory, practical, and clinics. Each course is of minimum 2 credits. The maximum credits for theory course is 4; theory and practical combined is 5.

3 Attendance

3.1 Minimum attendance requirements for each course is:

i. Theory : 85 %

ii. Clinics / Practical : 90 %

3.1 As per the directives of MAHE, there will be no consideration for leave on medical grounds. The student will have to adjust the same in the minimum prescribed attendance.

3.2 Students requiring **leave** during the academic session should apply for the same through a formal application to the Head of Department through their respective Class In-charge/ Coordinator. The leave will be considered as absent and reflected in their attendance requirements.

3.3 No leverage will be given by the department for any attendance shortage.

3.4 Students, Parents/ guardians can access the attendance status online periodically. Separate intimation regarding attendance status would not be sent to parents/students.

3.5 Students having attendance shortage in any course (theory & practical) will not be permitted to appear for the End-semester exam (ESE) of the respective course.

4 Examination

4.1 Exams are in two forms – Sessional examination (conducted as a part of internal assessment) and End semester examination.

4.2 The final evaluation for each course shall be based on Internal Assessment Components (**IAC**) and the End-semester examinations **(ESE)** based on the weightage (as indicated in clause 5.1) given for respective courses.

4.3 IAC shall be done on the basis of a continuous evaluation after assessing the performance of the student in mid semester exam, class participation, assignments, seminars or any other component as applicable to a course.

4.4 All the ESE for the odd semesters **(regular ESE)** will be conducted in November-December. All the ESE for the even semesters **(regular ESE)** will be conducted in May-June.

4.5 For those whose failed to clear any course during regular ESE, a **supplementary /make up exam** is conducted 2 weeks immediately after the ESE result declaration to enable him / her to earn those lost credits. A nominal fee as per MAHE rules will be applicable during this examination.

4.6 For core courses, the duration of ESE for a 2 credit course would be 2 hours (50 marks) and for a course with 3 or more credits, 3 hours (100 marks). For program elective course, the exam duration is 3 hours (100 marks).

5. Weightage for Internal Assessment Component (IAC) and End Semester Exam (ESE)

5.1 Any one or a combination of marks distribution criteria applicable to a course.

IAC Weightage (%)	ESE Weightage (%)
30	70
50	50
100	Nil
Nil	100

6. Minimum Requirements for Pass

6.1. Pass in a course will be reflected as grades. No candidate shall be declared to have passed in any course unless he/she obtains not less than **"E" grade**

6.2. For all courses (core / non-core), candidate should obtain a minimum of 50% (ESE) to be declared as pass.

6.3 When a student appears for **supplementary examination**, the maximum grade awarded is "C" grade or below irrespective of their performance.

6.4. For students who fail to secure a minimum of 'E' grade for a course, an **improvement examination** is conducted to improve their IAC marks. The student can appear for these examination along with the subsequent batches' mid semester / sessional exams. The marks obtained in other components of IAC can be carried forward without reassessment. A nominal fee is charged as per MAHE for per course of improvement in IAC.

7. Calculation of GPA and CGPA

7.1. Evaluation and Grading (**Relative Grading**) of students shall be based on GPA (Grade Point Average) & CGPA (Cumulative Grade Point Average).

7.2. The overall performance of a student in each semester is indicated by the Grade Point Average (GPA). The overall performance of the student for the entire program is indicated by the Cumulative Grade Point Average (CGPA).

7.3. A ten (10) point grading system **(credit value)** is used for awarding a letter grade in each course.

Letter Grade	A+	A	B	C	D	E	F/I/DT
Grade points	10	9	8	7	6	5	0

DT – Detained/Attendance shortage, I – Incomplete

7.4 Calculation of GPA & CGPA: An example is provided

Course code	Course	Credits (a)	Grade obtained by the student	Credit value (b)	Grade Points (a x b)
AHS 101	Course - 1	4	B	8	32
AHS 103	Course - 2	4	B	8	32
AHS 105	Course - 3	3	A+	10	30
AHS 107	Course - 4	4	C	7	28
AHS 109	Course - 5	5	A	9	45
	Total	**20**	**-**	**-**	**167**

1st Semester GPA = Total grade points / total credits

167/20 = **8.35**

Suppose in **2nd semester GPA** = **7** with respective course credit 25

$$\text{Then, 1st Year CGPA} = \frac{(8.35 \times 20) + (7 \times 25)}{20 + 25} = 7.6$$

8. Progression Criteria to higher semesters

8.1 There is no separate criteria / credits required in order to be promoted to the next academic year.

8.2 However, in order to be eligible to appear for fourth semester (Theory / practical / project submission), the student should have cleared all his previous semesters (i.e. first, second and third).

8.3 The student must complete all the course work requirements by a **maximum of double the program duration**. For e.g. 2 years' program, all the academic course work needs to be completed within 4 years. Failure to do so will result in exit from the program.

9. Semester Break

9.1 Students will have a short semester break following their odd and even end-semester examinations.

10. Project / Dissertation

10.1 Project / Dissertation will carry credits and marks (as applicable to each program)

10.2 Final copy of dissertation **(e-copy)** to be submitted by end of March for plagiarism check and submission to University. A **single hardcopy (student copy)** of the dissertation to be prepared and presented before the external examiner during the viva-voce.

10.3 **Manuscript** format of the thesis also to be submitted to the respective guides / dept.

11. Award of Degree

11.1 Degree is awarded only on **successful completion of entire coursework**.

Head of the Department **Dean**

Deputy Registrar - Academics **Registrar**
