

Urology Department, KMC, Manipal

1. Why to choose M.Ch. Urology at KMC Manipal?

Department of Urology and Renal Transplant is one of the oldest in India. It offers 3-year training and teaching program in Urology. Department has its own space in national arena and is progressing ahead to mark its presence in global platform. Department offers tertiary care clinical services in all urology subspecialties. It is one, performing maximum number of Endourological procedures in whole country for many years. Department is equipped with modern infrastructure and newer equipments.

2. Core competencies pursued during postgraduate training at Manipal

- This program offers postgraduates ample exposure to teaching, surgical skills in Urology, and development of cognitive skills in Urology. During their Training, enough experience is gained in subspecialties like Endourology, Reconstructive Urology, Uro-oncology. Overall, with emphasis on holistic, ethical and patient centric, residents are trained to transform into Urologist with a difference. Under supervision of Faculty, grooming is done to present the clinical work at different Urology forums, in and outside country. Residents are encouraged to get involved in research activities.
- Department provides encouragement, guidance and mentorship to residents to choose the career path in Urology. Foreign Faculty are contacted to provide training and fellowship opportunities to our students and younger Faculty. Incoming students will have

opportunity to develop himself as Urologist with a difference after three years of training.

3. Career opportunities after Post graduation

The training provides the platform to work as

- Consultant in Private practice or corporate set-up
- Fellowship in subspecialties
- Teaching Faculty in Institutions
